Theoretical and Applied Fracture Mechanics 18 (1993) 285
Elsevier

Contents Volume 18

Vol. 18, No. 1

J.J. Hickey and J.H. Bulloch
Review of nondestructive techniques designed to evaluate elevated temperature toughness degradation 1
J.H. Bulloch
Effects of mean stress on the threshold fatigue crack extension rates of two spheroidal graphite cast irons 15
G.C. Sih and E. Baisch
Angled crack growth estimate with overshoot and/or overload 31
M. Mirzaei and J.W. Provan
A new method for the analysis and assessment of fatigue crack closure. I: modeling 47
M. Mirzaei and J.W. Provan
A new method for the analysis and assessment of fatigue crack closure. II: experimental study 59
D.A. Zacharopoulos, G.N. Diamantaras and Ch.G. Tsimpoli
Crack growth in concrete slab resting on steel beam: softening and damage accumulation 65
D.B. Popejoy and L.R. Dharani
Effect of fiber coating and interfacial debonding on crack growth in fiber-reinforced composites 73
E. Smith
Effect of loading on crack growth resistance behaviour of a ligament toughened brittle material 81

Vol. 18, No. 2

N.C. Huang and J.G. Swadener
An investigation of hydraulic fracturing. Part I: one-phase flow model 89
J.G. Swadener and N.C. Huang
An investigation of hydraulic fracturing. Part II: two-phase flow model 103
G.C. Sih and C.T. Li
Subcritical crack growth in elastic-plastic material with overshoot: Part I—analytical modelling 115
G.C. Sih and C.T. Li
Subcritical crack growth in the elastic-plastic material with overshoot: Part II—numerical results 131
M. Zheng and X. Zheng
Empirical assessment of ductile fracture initiation in steel bars with notch and three-point bend specimen with edge crack . . 157
W.H. Müller, G. Herrmann and H. Gao
Elementary strength theory of cracked beams 163

Vol. 18, No. 3

M. Mirzaei and J.W. Provan
The effect of crack wake characteristics on fatigue crack closure: Part I—a crack wake removal study 179
M. Mirzaei and J.W. Provan
The effect of crack wake characteristics on fatigue crack closure: Part II—a non-uniform wake study 185
G.C. Sih and J.W. Ho
Rigid-plastic and damage behavior in metal forming: Part I—theoretical development 193
G.C. Sih and J.W. Ho
Rigid-plastic and damage behavior in metal forming: Part II—model prediction 211
J.M. Bastero and J.M. Martínez-Esnaola
Singular character of axisymmetric stresses around wedge-shaped notches in cylindrical bodies under torsion: unit step load 247
Y.L. Li, S.Y. Hu and R.J. Tang
Interaction of crack-tip and notch-tip stress singularities for circular cylinder in torsion 259
T. Kondo and H. Sekine
Anti-plane shear of kinked interface crack in bonded dissimilar anisotropic solid 273
